PROFILE

I'm a career-changer who moved into programming two years ago.

I have finished the one year Link Academy "FrontEnd Javascript Developer" program and I've tested my skills so far by gaining the Javascript Algorithms and Data Structures, Responsive Web Design and FrontEnd Libraries certifications from freecodecamp.com.

Because of my strong motivation and combining my artistic skills together with my fresh gained technical skills, I believe I can be the right person for a frontend developer or a web developer position.

MY PROJECTS

1. [Fullstack responsive Todo List](#)

Frontend Technologies used: Vue JS, VUEX, HTML, SCSS

Backend Technologies used: Node.js, Express, Redis

2. [Fullstack Nuxt Blog](#)

Frontend Technologies used: NUXT, VUEX, HTML, CSS

Backend Technologies used: Firebase

3. [Vue Coaches App](#)

Frontend Technologies used: Vue JS, VUEX, HTML, CSS

Backend Technologie used: Firebase

[Github source files](#)

4. [FrontendMentor website](#)

HTML, SCSS, Javascript

5. [Javascript Projects](#)

EMPLOYMENT HISTORY

FRONTEND DEVELOPER - FREELANCER

2019 to present

- Design and implement new user interface designs for applications using JavaScript, SASS, HTML, Vue and React.
- Implementing fluid responsive frameworks

OWNER & PHOTOGRAPHER

Antochi Photography | 2009 to present

- Principal photographer and coordinator of the other photographers according to each event

SOFT SKILLS

- Capacity to work under tight deadlines;
- Quick learner;
- Attention to the details;
- Capable to work on goals hard to achieve, nonstandard situations are motivational key points for me;
- Team player;
- Good task organizer;
- Empathic;
- Communication skills;
- Creative

MY GOALS

I would like my first five years in front-end development to be about building my skills and knowledge as well as actively participating in the community and in making it a better and more accessible place for everyone.
